INTRODUCTION

This publication presents international merchandise trade statistics up to the June quarter of 2017. It follows on from Statistical Bulletin 14/2017.

This publication follows the United Nations definitions and compilation practice of merchandise trade statistics. Technical notes relating to data sources, classification of commodities, valuation, timing of recording and other technical issues can be obtained from the National Statistics Office on request.

The primary data source used in compiling merchandise trade statistics is the Solomon Islands Customs and Excise Division's import and export entries. Other secondary data sources used include the Central Bank of Solomon Islands' balance of payments data (BOP), administrative records from the Commodity Export Marketing Authority (CEMA) and import/export records furnished by major importers and exporters.

Major data limitations highlighted in previous bulletins are again noted as follows:

1. Data from Customs and Excise Division is in unedited format and validated only at the aggregate level. Statistics on the volume of trade cannot be compiled adequately given the poor quality of the volume data.
2. Data from Customs and Excise Division represents mainly trade through the Honiara port and to a lesser extent data from other outer island ports.
3. Data from 1998-2000 and the first two quarters of 2009 are unavailable or incomplete for the purpose of a time series covering these periods.
4. Data on illegal trading of goods, which may include significant quantities, is not captured in this publication.
5. A number of other secondary data sources are used to adjust for discrepancies in the data from Customs and Excise Division
6. Data from third quarter 2015 and onward are extracted from the newly introduced ASYCUDA system which is now adopted by the Solomon Islands Customs and Excise Division.
7. Data on major commodities such as fish, copra, cocoa, palm oil, rice, fuel and tobacco are sourced from the industries while the remaining commodities are sourced from the ASYCUDA system.

Small discrepancies between totals and sums of commodities in tables are due to rounding.

The following symbols are used in the publication:

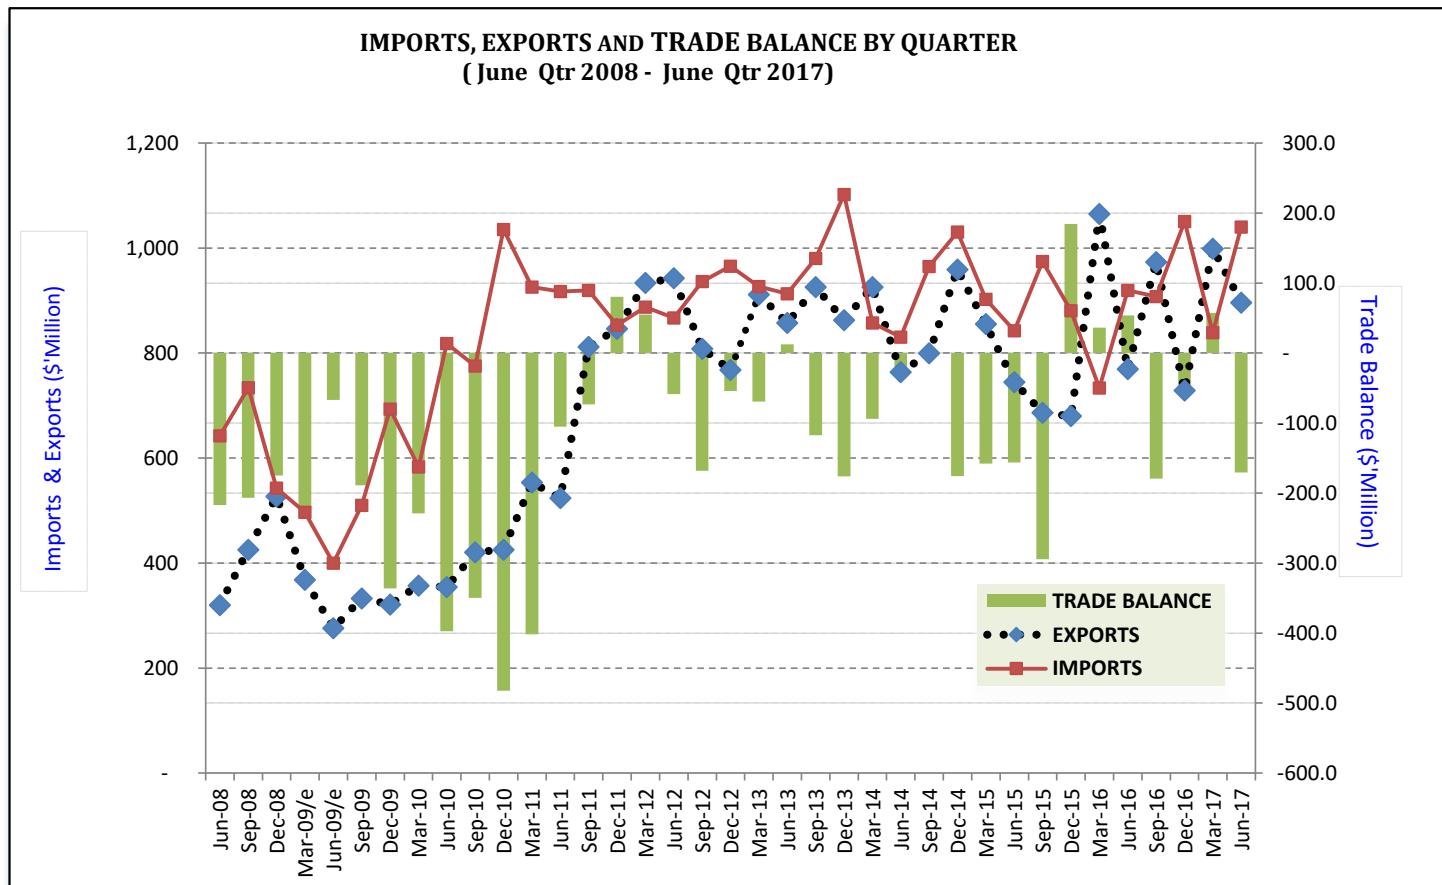

- Nil if representing a value
- Negative change if representing a percentage change
- + Positive change if representing a percentage change
- p Preliminary or provisional figure, subject to revision
- e Estimated

HIGHLIGHTS

The international merchandise trade balance recorded in the June quarter of 2017 shows a deficit of \$170.5m. This is a decrease of \$228.0m (396%) over the surplus of \$57.5m recorded in the preceding quarter. In terms of the corresponding quarter a year ago, this represented a decline of \$224.1m (418%) over the surplus of \$53.6m in 2016.

The year-ended June 2017 recorded a deficit of \$344m, a reduction in the trade balance of \$324m (1,606%) over to the deficit of \$20.2m recorded in the year ended June 2016.

Merchandise trade by major commodity in the second quarter of 2017 compared to the corresponding quarter of 2016 recorded the following:

- Round log and sawn timber exports declined by \$84.7m (13%) to \$588.1m.
- Total of fresh/frozen and canned fish also declined by \$15.7m (16%) to \$84m. The decline is mainly attributed to a drop of \$15.5m of loin exports to Italy which accounted for 28.2% of total fish exports.
- Total of cocoa, palm oil and other agricultural products has decreased by \$26.5m (16%) to \$134.5m. This is mainly driven by a low production in palm oil exports during the quarter.
